Select Plans Overview

The images below further outline the Select rating area requirements. In summary, Select members must live or work in the Select Counties (green). If the employer is located in the Select Counties (green), that obviously satisfies the "work" requirement.

Because of MD's geography, many employees work across county lines, therefore we allow employers in bordering counties (orange) to offer Select only to members living in Select Counties (green). That would satisfy the "live" requirement, and because those members live in Select Counties, they have adequate access to Select providers.

Finally, employers in the far corners of the state (red) cannot offer Select to any employees. Those counties are too far from Select Counties (green).
