

## Taxes and fees made easy

### New Aetna Funding Advantage<sup>SM</sup> report and calculator

Figuring out all the Affordable Care Act (ACA) taxes and fees takes time – time that you and your clients don't have. That's why we're making it easier. Our new report helps your clients determine their membership counts for the Patient-Centered Outcomes Research Institute (PCORI) annual fee. And, we have a new tool that even helps you calculate their total fee for them. It's fast and easy.

#### **Medical Membership Enrollment by Tier Report and PCORI Calculator**

Our new report provides a breakdown of membership by tier for each month. Membership tiers include employee, employee and spouse, employee and children, and employee and family. In addition, it displays total employees and total members across all tiers. Once membership totals have been established, plan sponsors can use the PCORI instructions in the attached letter to calculate their annual fee. They can access the new Medical Membership Enrollment by Tier Report at <https://www.aetna.com/ahia/login>.

You also have access to the PCORI calculator. Just [click here](#), then click on the "Tools" tab.

#### **Share the good news with your clients**

Be sure to send the [plan sponsor letter](#) to your clients, letting them know about the new Medical Membership Enrollment by Tier Report.

**For more information on Aetna Funding Advantage taxes and fees, check out our Frequently Asked Questions on [Producer World](#), under "General Information". Or, you can always talk to your Aetna representative.**
