

Specialty-drug accumulator rules coming January 1, 2020

July 18, 2019

IngenioRx's specialty-drug accumulator rules are designed to help your ASO clients control their plan's costs. They will also help them keep their plan the way they designed it.

An accumulator tracks employees' out-of-pocket (OOP) costs. Our accumulator rules prevent manufacturer subsidies from counting toward deductibles and OOP costs. But they don't apply when members receive needs-based financial aid. Members will still be able to use those subsidies to save on their prescriptions, but it may take longer for them to meet their deductible and OOP maximum.

Let your ASO clients know so they can choose to add these rules to their plan upon renewal beginning January 1, 2020.
