CareFirst Extending Dental PPE Reimbursement and Stop Loss Coverage

Effective June 1, CareFirst began reimbursing in-network dentists \$7 per claim, per date of service. To continue supporting dental practices' efforts to maintain a high level of safety and keep patient costs from spiking, CareFirst is extending this reimbursement through October 31, 2020.

In addition, CareFirst Stop Loss coverage for employees affected by furloughs, layoffs or reduced hours has been extended through October 31, 2020.

This extended coverage is subject to:

- The continued payment of administration fees and stop loss premiums.
- Accounts must send their CareFirst account executive email notification of COVID-19-related employment changes by October 31, 2020.

This accommodation does not apply to employees terminated prior to or during a furlough or layoff period. Terminated employees should be offered continued coverage under COBRA.

ASO clients with commercial stop loss coverage should seek guidance from their broker/consultant and/or stop loss carrier.
