Class I (D&P) Services Waived from Annual Maximum on all Shelf PPO Products

Benefits designed to promote wellness and increase value

All of Dominion National's shelf PPO products are built with Class I (Diagnostic and Preventive) services waived from the annual maximum and deductible. The annual maximum waiver equates to nearly \$500 of additional annual maximum value per member¹ that can be repurposed for more costly procedures should more serious issues arise. By placing an emphasis on preventive care, our plans promote both oral and overall health in an effort to help avoid costly dental treatment that could arise without routine care.
