## News from Evergreen Health

As our valued partners, we wanted to make you aware that today there was a court decision not to grant Evergreen Health a temporary restraining order or preliminary injunction staying the impact of the flawed risk adjustment formula put in place by CMS.

While we were disappointed by this news, we will soon file an appeal of this decision with the U.S. Court of Appeals for the 4th Circuit.

We are also continuing our efforts to secure outside financing to allow us to pay our 2015 risk adjustment assessment should that ultimately be necessary.

We will keep you posted on any other information or details.
