

healthPERX March 2018 Client Newsletter

Why is healthPERX so beneficial?

Every week, if not several times a week, we hear from our groups. Why? Their insurance carrier has offered them telemedicine at little or no cost. Why is healthPERX different? There are several reasons. **First**, and most important, almost all of our members have a **\$0** consult fee. Most insurance companies are **\$40** or **\$49**. What does that mean? One, members don't use it if they have to pay a co-pay anyway. Two, if they do use it and they are told that they need to see a doctor. They still have another co-pay! Second, if they use it through their insurance company, it will go against your companies utilization numbers. That is avoided with healthPERX. **Third**, healthPERX continues to remind you and your employees in our ongoing newsletters to keep this benefit front of mind. All these things increase utilization and reduce costs to you and your employees

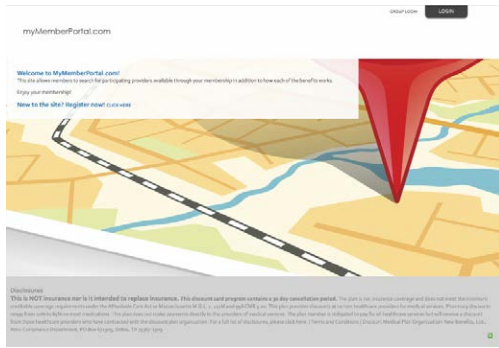

Spring Allergy season is here. Time to remind your employees about Teladoc.

When everything is in bloom, allergies come alive. Whether it's the first time or it's a yearly happening, remind your employees to call Teladoc when your employee or any of their family members are suffering.

Here a great flyer to post in your breakroom or send to your employees.

[It's Another Allergy Season](#)

Access all benefits at mymemberportal

Members can register at www.mymemberportal.com to view all benefits and directly register for Teladoc and request a consult.

Encourage use of the Teladoc App

Once registered with Teladoc, your employees can download the Teladoc App for quick and easy access to doctors through a video or phone consult with the Teladoc App.
