

KAISER PERMANENTE®

Kaiser Permanente and Allied Benefit Systems (Allied) have come together to create an innovative new product that combines fully-insured and self-funded services into a single solution. This new full replacement product is a paired offering available to employers with 100 or more eligible employees. This custom solution offers employers high quality, more choice, greater cost management, and administrative simplicity.

As part of this exclusive paired offering, brokers can leverage Kaiser Permanente's highly regarded fully-insured options with Allied's product diversity and national network coverage. Additionally, this arrangement means Kaiser Permanente brokers can offer a new solution to employers who may not have considered our plans before. The partnership also alleviates the need to find carriers to work together to provide the type of care, coverage and pricing that larger employers are looking for.
