CVS and IngenioRx specialty pharmacies will no longer provide Botox

November 19, 2021

CVS and IngenioRx specialty pharmacies will stop distributing the brand name drug Botox® starting January 1, 2022. The member benefit is not changing. Botox will still be available to our members through other specialty pharmacies. Members who do not use IngenioRx or CVS specialty pharmacies will not be affected.

We will send letters to impacted members telling them they'll have to move their prescriptions to a different in-network pharmacy.

Please contact your sales representative for more information.
