# RX Guide pharmacy reporting now available in CII Discover

April 14, 2022

RX Guide pharmacy reporting is now available for Large Group and national self-funded (ASO) group accounts that have more than 100 subscribers and that participate in the IngenioRx pharmacy program. There, you can find useful information about pharmacy claims that can help you make informed benefit decisions.

RX Guide is an interactive reporting and analytics tool. It pulls together industry-wide and individual data on everything from plan trends to cost drivers, clinical programs, and utilization management. That information can help guide your decision-making.

## Other key RX Guide features include:

- Dashboards focused on useful measurements such as key performance indicators (KPIs), membership data, and utilization trends
- Top prescriber and pharmacy information
- Interactive maps

Log in to **CII Discover**, then **select RX Guide** to request and review your reports. RX Guide data is currently available on an incurred basis at the total account level only.

For more information, contact your account service representative.
