Open Enrollment Benefit Automation Updates

This fall, we launched our new [open enrollment print experience](#) for members. Based on feedback from our sales, brokers and consultants, we have adjusted our print on demand system to make it easier to build the new open enrollment books for clients.

Beginning Friday, November 20, sales and brokers using the print on demand system will be able to build books and automatically populate medical benefits for groups with **standard medical plans**. If an account has **custom medical plans**, users will still need to manually enter benefits into the book template.

COMING SOON! We will automate standard pharmacy, dental and vision benefits in the coming months.

For more information, visit the frequently asked questions on carefirst.com/openenrollment. If you need help using the new automation feature, email lrc.mail@carefirst.com.
