

For brokers and producers only

Date: July 26, 2021

**Markets: 51+ Groups**

## Renewal Packet Changes

CareFirst BlueCross BlueShield and CareFirst BlueChoice, Inc. has implemented new reporting changes within the renewal packets for renewals November 1, 2021, and after.

For the 51-99 market segment, a new Projected Rating Report has been created which will be available for applicable renewal packages. This new Projected Rating Report will provide information such as High-Cost Claimant and annual trends to help you in presenting renewals to your group clients. This is not applicable to groups that are block rated.

In addition to these changes, for all 51+ insured renewals, the High-Cost Claimant information provided will be set to 50% of the group's respective pooling level. For groups that receive a listing, there will also be some changes to the status of High-Cost Claimants.

Your Account Consultant will be reaching out to provide more details ahead of upcoming renewals.
