Implementing a COVID-19 Vaccine Requirement

As a healthcare company, CareFirst understands that protecting the health and safety of those we serve starts with us. In August 2021, CareFirst BlueCross BlueShield announced a requirement for our workforce and Board of Directors to be fully vaccinated against COVID-19 or acquire a medical or religious exemption. Today, 95% of our employees are fully vaccinated. To continue to support our communities, we developed a case study to share our experiences, lessons and the decisions we've made to help organizations navigating the same journey. You can help spread the word to your accounts and partners—feel free to use this [email content](#) that links to the case study. Through our shared commitment to the COVID-19 vaccination effort, we can lead the way back to better.
