Dominion National Celebrates 25th Anniversary

Arlington, Va. - Dominion National today celebrates its silver anniversary, marking 25 years of service as a leading insurer and administrator of dental and vision benefits. Headquartered in Arlington, Va., Dominion was founded in 1996 by President Mike Davis and other industry veterans as a Mid-Atlantic dental insurer, quickly becoming one of the region's largest dental HMO carriers in its first couple of years.

Over the past few years, Dominion has tripled its membership to more than 900,000, expanded coverage into 14 states and Washington, D.C., evolved its product portfolio and extended provider access to more than 350,000 national dental listings and 81,000 vision provider listings. The company's more than 200 employees serve a diverse client base including employer groups, individuals, associations, health plans, providers and producers.

"We started Dominion with the goal to solve common pain points in the dental insurance industry. The pursuit to find that 'easy button' for our customers was the foundation in which Dominion was built," said Davis. "We've come a long way in the last quarter century and we couldn't have done it without our customers, partners and each of our dedicated employees who demonstrate a commitment to our mission of being the easiest benefits company to work with."

As a pioneer in the insurance industry, Dominion offers a robust selection of customizable, unique dental and vision plans for large and small employer groups and associations, as well as popular dental and vision benefits for individuals through its online enrollment program, Teethkeepers.com, and several exchanges, or healthcare marketplaces. Dominion also is on the cutting edge of teledentistry solutions to help increase access to care, oral health engagement, convenience and cost savings.

Dominion's expansion also includes health plan partnerships. More than a dozen health plans across the country contract with Dominion as a private-label administrator of their dental programs. Dominion's goal is to allow its

health plan partners to focus on their core medical benefits, while Dominion does the heavy lifting on dental administration, network management and other supporting functions.
